Base = selected profiles; Res. obs. = company/site research records with possible entity overlap. Operating = current supported site records; precise = address matches, not tenancy proof. Typed plan leads cover structured site records only; zero is not absence of planning actions. Priority is record-based analyst assumption, not lease credit; U = unscored.

Cash period ends: n/a: no current exact USD cash observation. Exact global cash/equivalents; stale/unknown = n/a, not zero. Not local capital, demand, guaranty or lease credit. Cross-hub cash is not additive.
